

Serghei Ufrutov

Senior Full-Stack Developer

Chisinau, Moldova
[linkedin.com/in/ufrutov](https://www.linkedin.com/in/ufrutov)

Professional Summary

Full-stack developer with 12+ years of experience building cross-platform systems, real-time applications, and high-performance interfaces. Experienced in building scalable desktop, mobile, and web applications with modern React ecosystem combined with backend API engineering, production DevOps, and modern AI integration.

Core Competencies

- Full-stack system architecture and API development
- Real-time streaming systems (WebSocket, RTSP, H.264/H.265)
- Cross-platform applications (Electron, React Native, Next.js)
- High-performance UI engineering (WebGL, real-time dashboards)
- Production DevOps and CI/CD automation

Technical Skills

Languages: TypeScript · JavaScript · Python

Frontend: React · Next.js · React Native · Electron · Tailwind · Material-UI

Backend: Node.js · GraphQL · REST APIs · WebSocket · Supabase · PostgreSQL

Video & Graphics: WebGL · GStreamer · RTSP streaming

AI / ML: YOLOv8s · Hailo-8 NPU · Edge AI inference · Custom detection pipelines

AI / LLMs & RAG: OpenAI · Anthropic Claude · Vercel AI SDK · RAG (pgvector)

Testing & DevOps: Cypress · Playwright · Docker · GitLab CI/CD · Vercel · Expo EAS

Professional Experience

Software Engineer

Anteklab srl - Aylook Security Platform | Nov 2013 - Present

Contributing to Aylook's video surveillance ecosystem, delivering cross-platform applications and backend services for IP camera networks.

Contributed to cross-platform Electron + React desktop platform architecture

Contributed to backend APIs and integration layers connecting surveillance infrastructure and client applications

- Contributed to hardware-accelerated WebGL video rendering for multi-camera monitoring
- Worked with GStreamer pipelines supporting RTSP H.264/H.265 streams
- Contributed to WebSocket infrastructure for alarms, motion detection, and diagnostics
- Familiar with YOLOv8s AI detection on Hailo-8 NPU within the real-time monitoring pipeline
- Contributed to CI/CD pipelines, release automation, and platform stability improvements

Technologies: Electron · React · Node.js · Python · YOLOv8s · Hailo-8 NPU · WebGL · GStreamer · WebSocket · Docker · GitLab CI/CD

Frontend Developer

SkillGravity - HR Technology Platform | May 2013 - Jun 2015

Developed user-facing systems for HR platform enabling talent discovery and skill visibility.

- Built interactive dashboards and search interfaces
- Implemented responsive UI and data visualization
- Integrated frontend with backend APIs

Frontend Developer · UI/UX Designer

IT-Park Naberezhnye Chelny | Jul 2012 - May 2013

Designed and implemented web interfaces for technology park digital services.

Key Projects

Security Video Management Platform

Cross-platform desktop system for IP camera infrastructure monitoring.

- WebGL video rendering engine for multi-camera monitoring
- Real-time event system for alarms and motion detection
- Backend API integrations and cross-platform distribution

Stack: Electron · React · Node.js · Python · YOLOv8s · Hailo-8 NPU · WebGL · GStreamer · WebSocket · Docker · GitLab CI/CD

Cross-Platform Mobile Applications (Freelance)

Production mobile apps with authentication, real-time APIs, and CRM integrations.

- Shared architecture for iOS, Android, and Web
- GraphQL APIs and Supabase backend integrations
- Type-safe data flows with schema validation

Stack: React Native · Expo · TypeScript · GraphQL · Supabase · Tailwind

Education

Technical University of Moldova

Bachelor's Degree - Design and Printing Technologies | 2009 - 2012
